Safety Considerations for Investigators

- Access into hazardous areas
- Respiratory protection from unidentified hazards
- Puncture injuries to feet
- Heat exhaustion or heat stroke
- First aid training

Partnerships are key to all our success

Knowledge Transfer

- Properties of natural gas
- Combustible gas indicators (CGI's) and their limitations
- PE risers and the potential for secondary damage resulting in underground fugitive gas
- Evacuation considerations when natural gas is present in a structure
- The importance of ruling in/out underground gas migration and firefighter safety
- How natural gas odorant can be masked at a fire scene

Questions?

- Thank you for your time and attention.
