

Public Safety Incident Tracking Questions from EEI

May 18, 2022

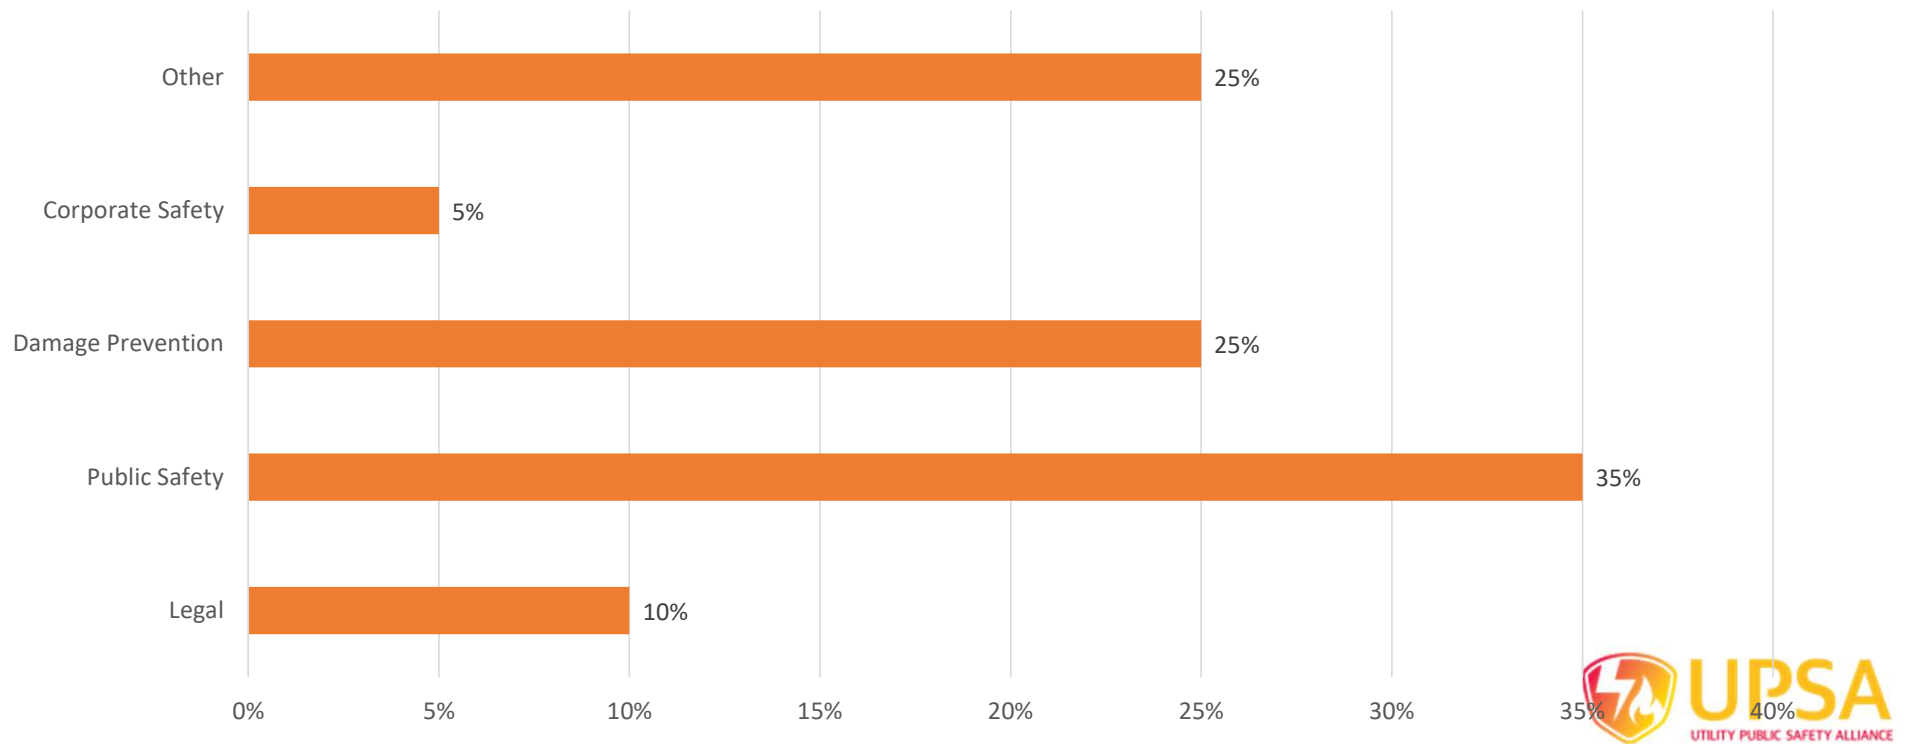

Chelsea Dodge

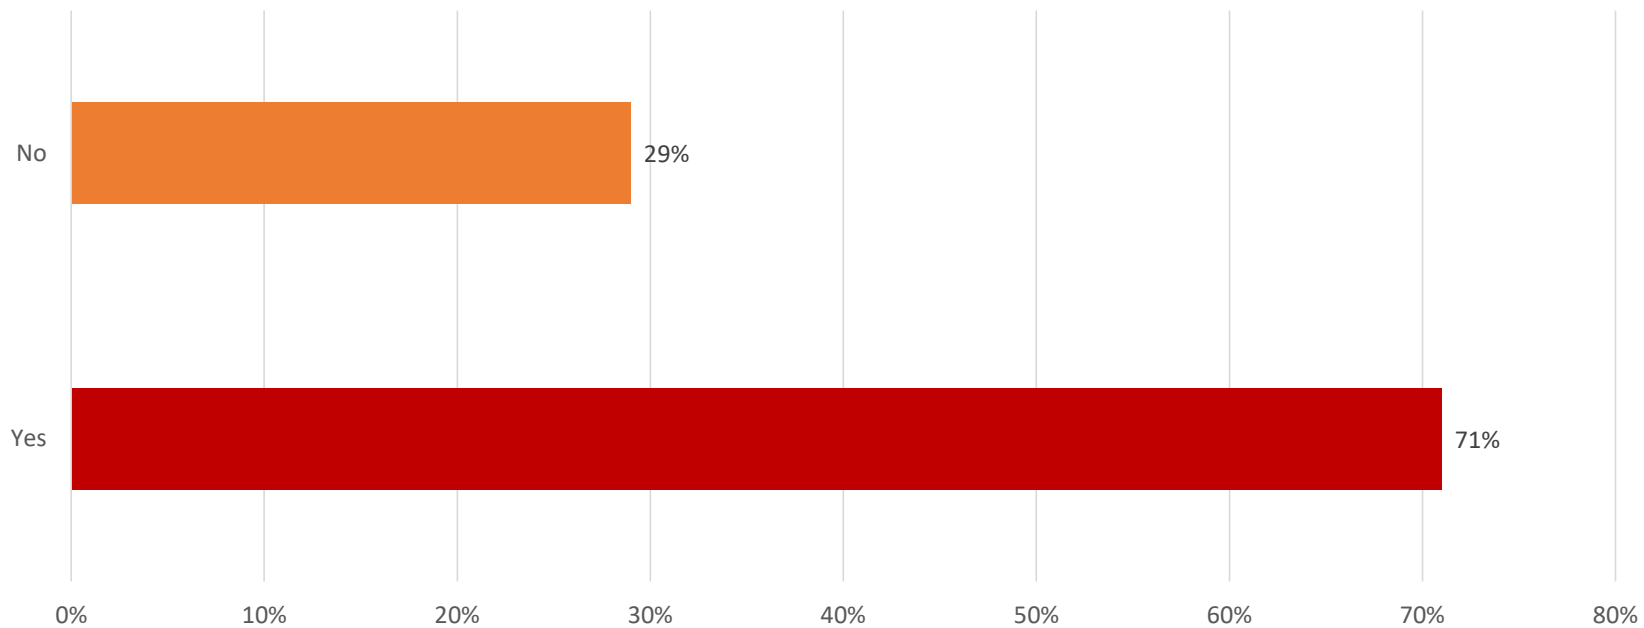

Does your company track public safety incidents?

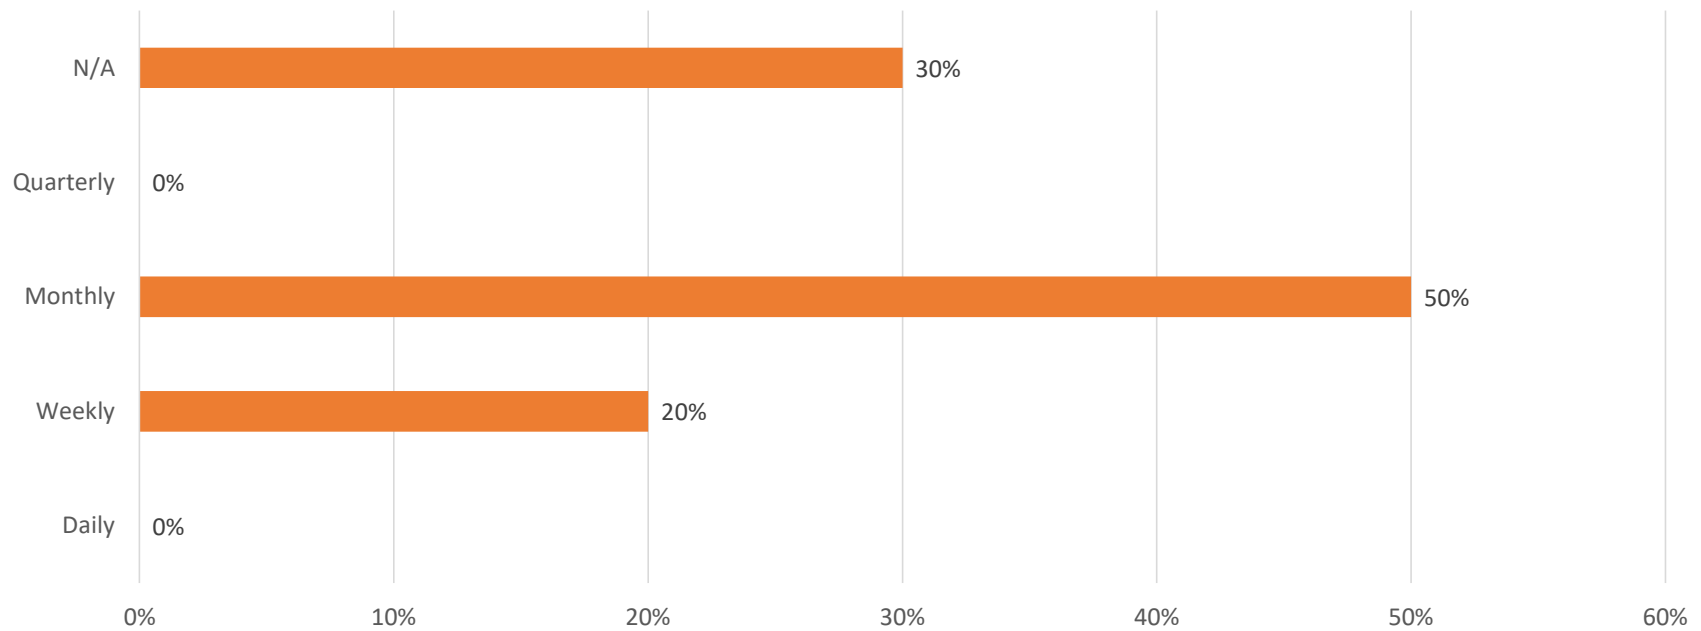

Which department is responsible for tracking those incidents?

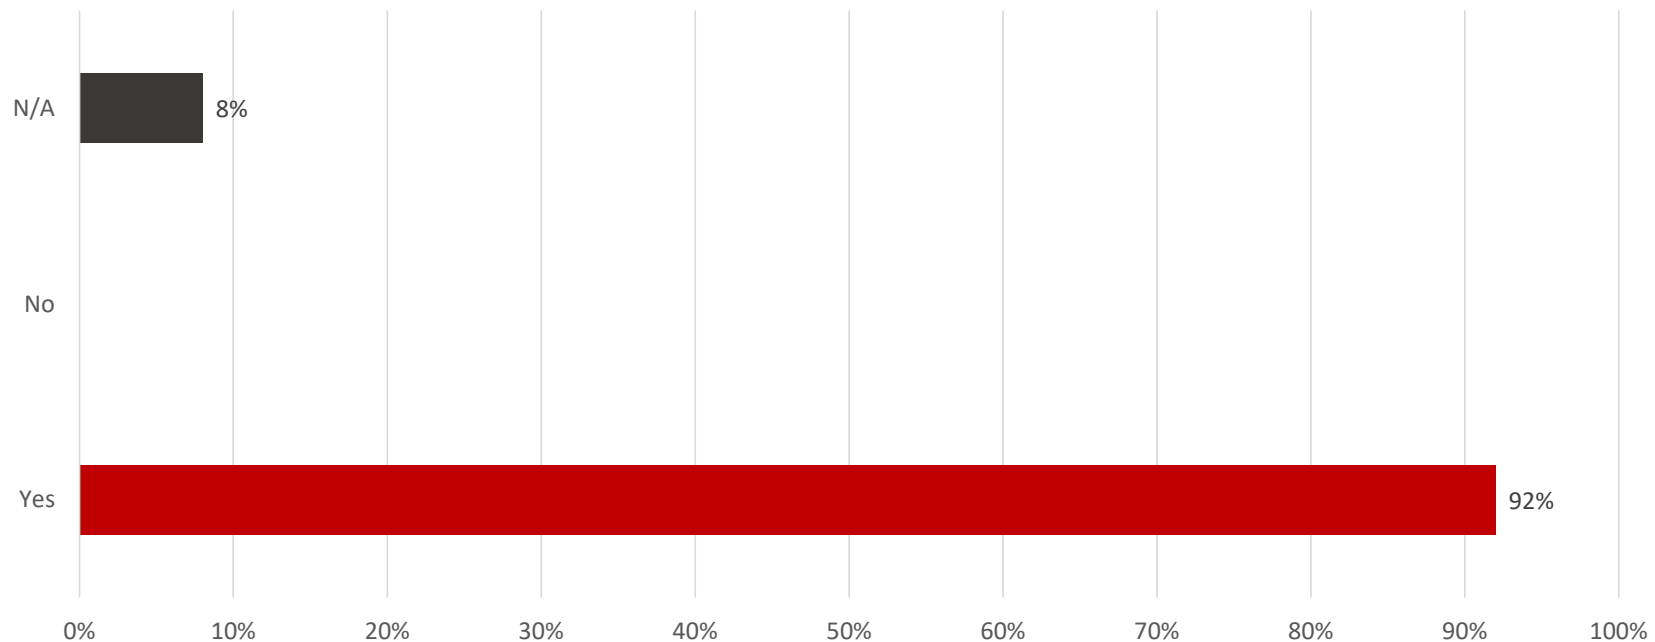

Do you meet with other departments to review the incident data?

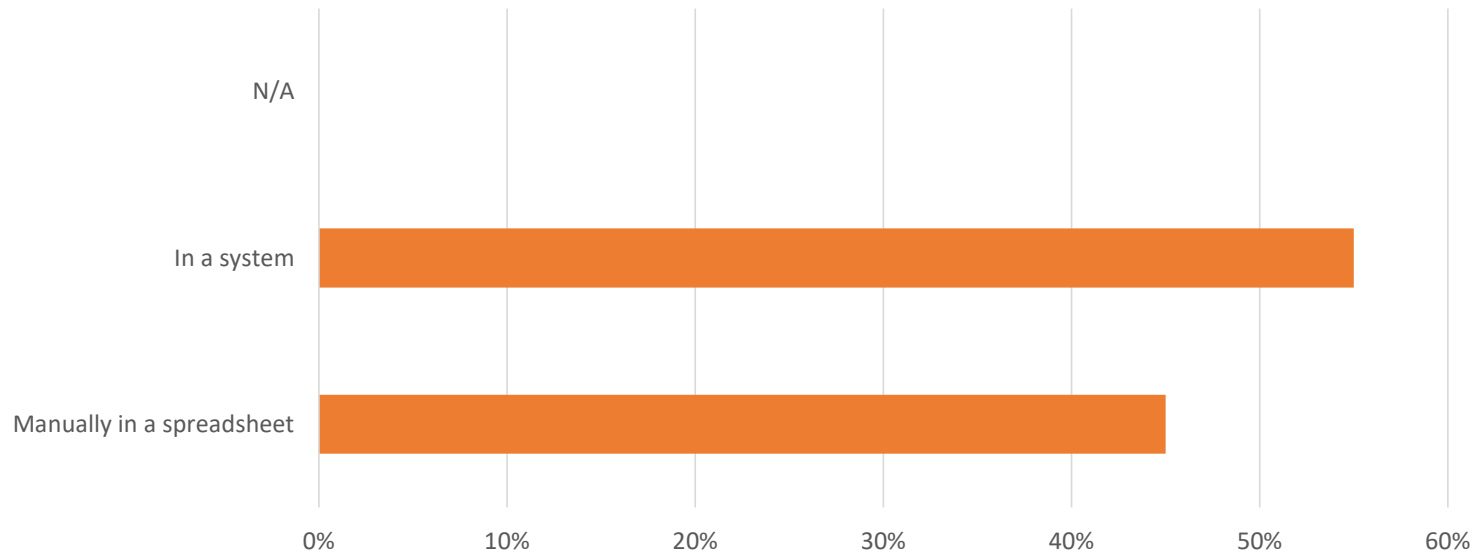

If yes, how frequently do you meet with them?

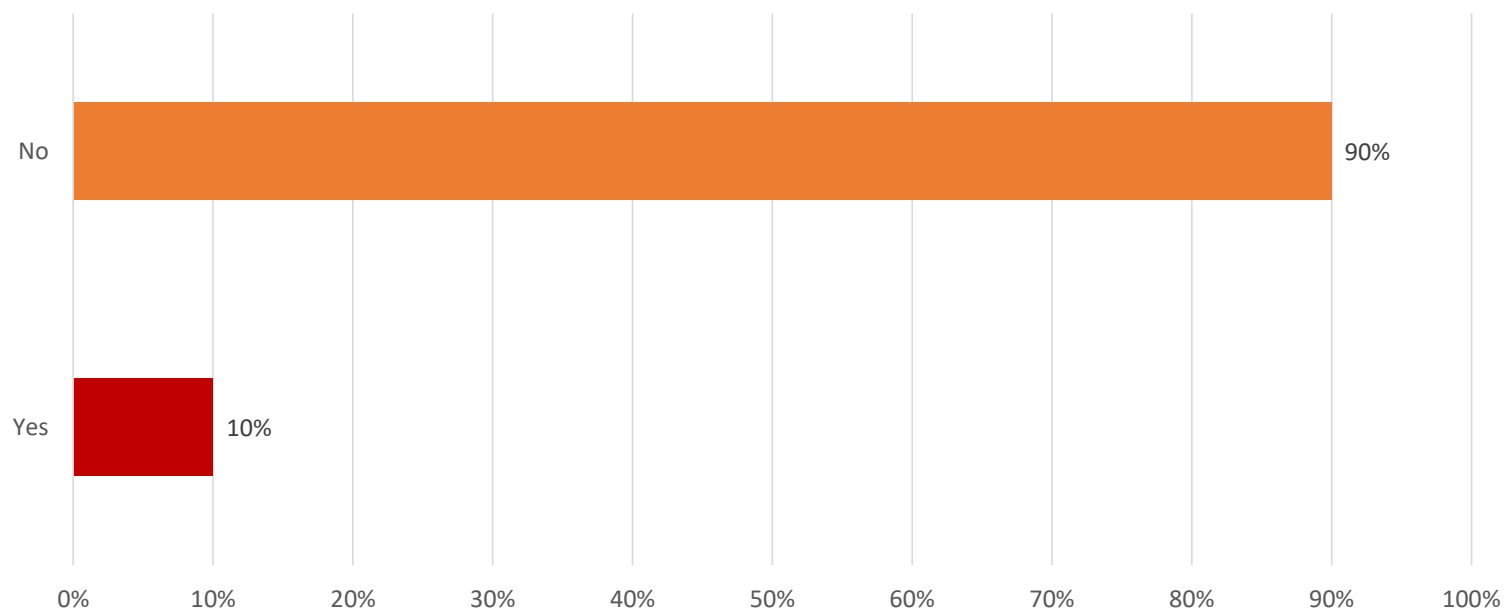

Do you categorize incidents based on type of asset (Natural Gas, Electric, Generation, etc.)

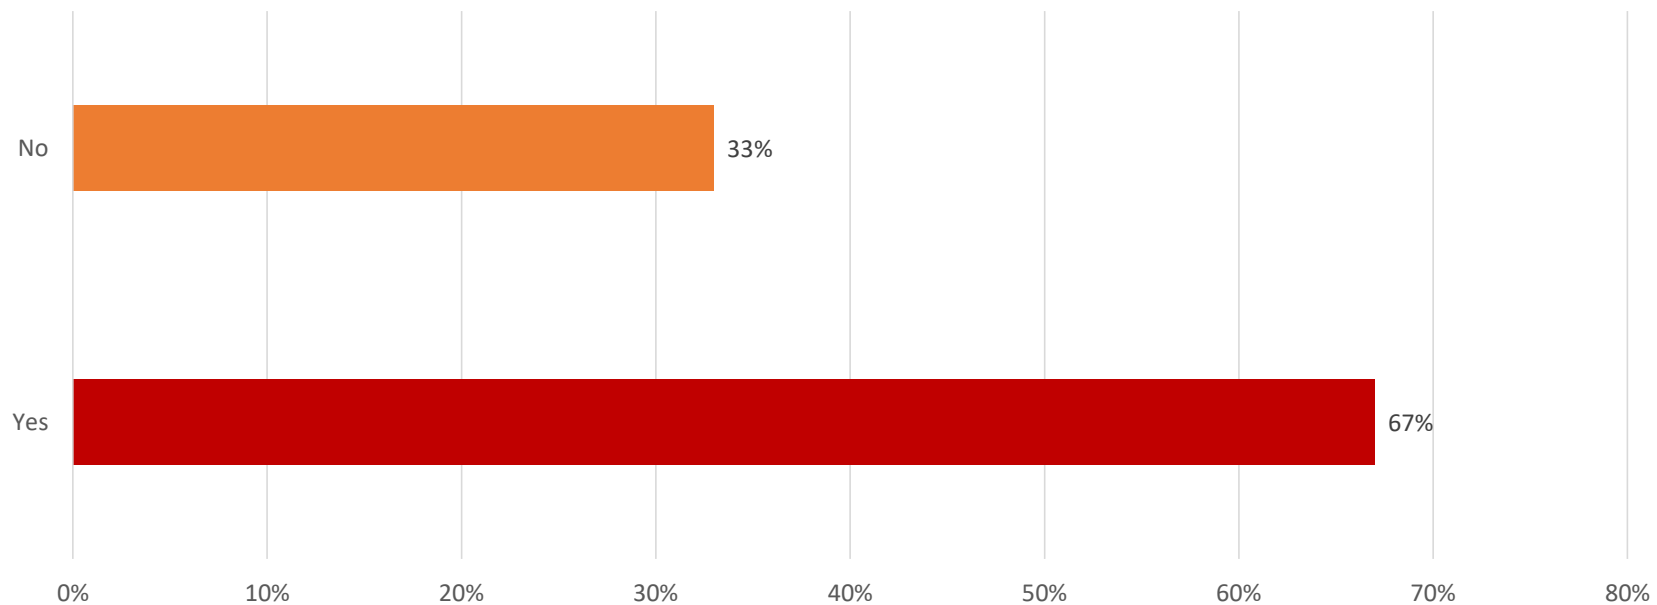

Do you have your data tracked manually in a spreadsheet or in a system?

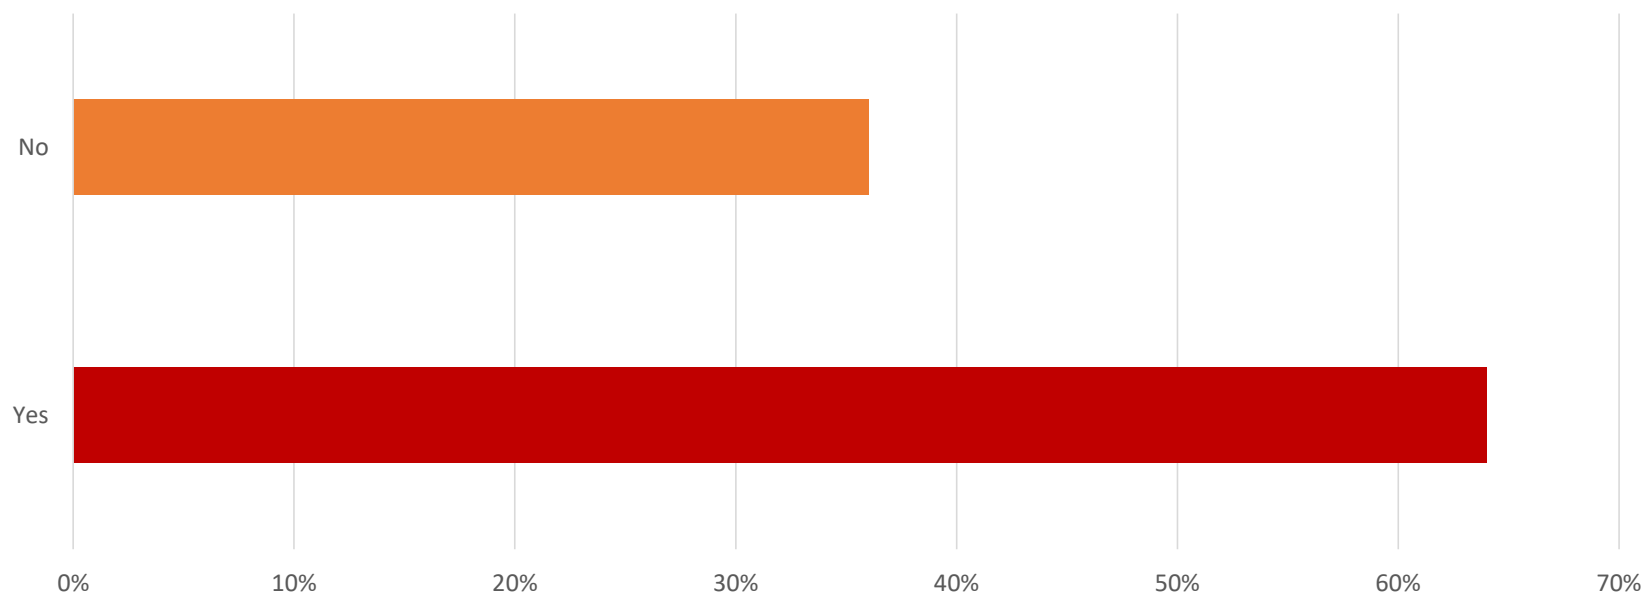

Do you currently use the EEI SCL (Safety Classification & Learning Model) to classify public safety incidents?

Does your company track public safety Good Catches/Near Misses?

Would you be able to provide your public safety incident data to benchmark with peer utilities?

If yes, how frequently would you be able to provide your incident data?
